

AIRBUS HELICOPTERS NORTH AMERICA AT A GLANCE

Airbus Helicopters, a division of Airbus, is the largest helicopter company in North America and has been proudly serving customers in the U.S. for more than 50 years, and in Canada for 39. The company continues to hold a leading position in the industry by providing a diverse selection of versatile and high-performance aircraft suited to perform even the most demanding missions. A team of nearly 1,000 people work hard every day building the H125 and UH-72 Lakota aircraft, making composite parts for the Airbus fleet, and providing world-class training, aftermarket support, and technical assistance. Airbus is committed to supporting its customers – and the nearly 3,200 helicopters they operate – throughout the region.

ECONOMIC IMPACT OF AIRBUS

More than 1,700 helicopters have come out of the Columbus production and completion centers. Airbus has trained more than 12,250 pilots in support of law enforcement, emergency medical services, utility, tourism, private and business aviation, and military pilot training operations.

Across all divisions, Airbus has spent more than \$58 billion with U.S. and Canadian suppliers over the last five years.

Airbus supports, directly or indirectly, more than 275,000 U.S. jobs in over 40 states and over 17,000 jobs in Canada.

FORT ERIE, ONTARIO

The Fort Erie facility customizes, completes and delivers aircraft and is a recognized center of excellence for engineering and composite manufacturing. It is the sole source supplier of composite parts installed on eight Airbus helicopter models flying all over the world.
